

Writing Assignment -- Peer Review Reflection

This assignment will require advance preparation. You will read and discuss the draft of one of your classmates' second PLA essay, and he/she will do the same for you. The goal is gaining valuable feedback that will assist you in revising your second essay.

(I will assign pairings when it gets closer to the deadline.)

I highly recommend getting in touch with your classmate as soon as I have assigned pairings. If you are both local, I suggest meeting in person. These meetings go much better when you can talk face-to-face. If you are not local, video chats work well. You may do a phone call, if that is the only option. You may NOT only correspond through e-mail; I want there to be a verbal dialogue about the work you have done.

I suggest exchanging papers before you meet or call each other. When reviewing each others' work, use the [Peer Review Guidelines](#) to guide your reading and discussion. After your meeting, I'd like you to write a 2-3 page reflection on the experience. Please answer the following questions in your reflection:

- (1) With whom did you meet with? How did you meet, and for how long? How did it go?
- (2) In a sentence or two, what learning experience do you describe in Essay 2? Why do you deserve university credit for this learning experience?
- (3) Which section is working well? Why?
- (4) Which section needs revision? Why?
- (5) What was some good specific feedback that your classmate gave you? Why was it helpful?
- (6) What was valuable about this experience? What was challenging?
- (7) If you were to do this experience again, what would you do differently? What would you do the same?
- (8) What did you learn from this experience, both reviewing another's work and having your work reviewed?

Purpose: To reflect on the peer review process.

Audience: Your professor.

Due date: Sunday, August 6, 2017. Final papers must be in proper APA format.
